ABOUT THE COMPANY

Established in 2017, BIO-IDZ is a Technology company that applies state-of-the-art technology to an entire ecosystem, including Fin-Tech, payment, identity, and security sectors, by infusing new trends that are future-ready.

BIO-IDZ provides innovative Fin-tech solutions in the Middle East, pioneering the next-generation contactless payment experience.

Skimming over the wearable tech wave, BIO-IDZ introduced #bpay, an intelligent wearable tokenization platform, facilitating payment functions to everyday Fashion-Tech accessories by linking debit or credit cards.

We work with Visa, Mastercard, RuPay and UnionPay.

With significant experience, BIO-IDZ offers a wide range of products, payment, transport cards, eco cards, ID's, and social cards of any complexity, including jewelry cards and NFC contactless payment wearables.

We also offer the development of designs for card products and innovative jewelry (with a high level of performance, creativity, and an individual approach to the task)

OUR PAYMENT JEWELRY AND ACCESSORIES

- CERAMIC PAYMENT RINGS
- JEWELRY PAYMENT RINGS
- KEYRINGS
- PAYMENT BRACELETS & STRAPTAG
- PAYSTRAPS & PAYCHIPS
- WATCHES
- KEYFOBS
- CHARMS & PENDANTS
- MONEY CLIPS
- DIVOTTOOLS
- METAL CARDS
- BIOMETRIC CARDS

TOKENIZATION ...EASY AS PIE

① Have a bank card

② Buy a wearable of your choice

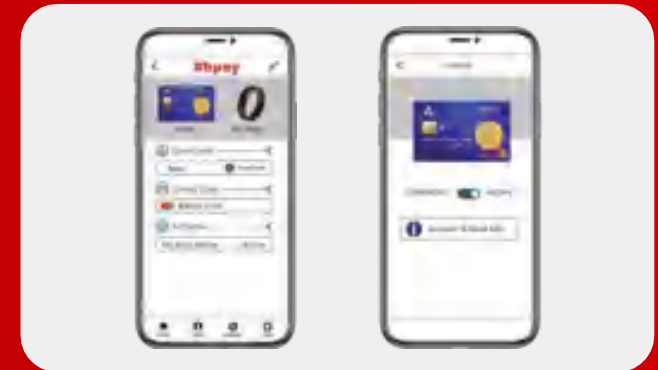

③ Add wearable and card to tokenization app

④ Link and load your card

⑤ Pay for anything

⑥ Manage wearable in the tokenization app

WHY #BPAY WEARABLES?

Differentiate and be the first

- be the first organisation to support passive NFC payment wearables & jewelry

Increase revenue

- statistics show that contactless payments happen more frequently than other payments

Enhanced security

- If a device is lost or stolen, the user can delete or replace its token, while continuing to use the physical bank card (tokenization system)

No energy needed

- #bpay wearables do not require an energy source to get a token and use it for payment (passive tokenization)

Drive loyalty, card usage and customer acquisition

- #bpay wearables can have custom-made designs

Easy implementation

- both personalisation and tokenization options are available
